Remote Learning 2020-2021

November Curriculum

It is important for children to know where they are, where they have been, and where they are going... now and in the future. This November, children will reflect on **where they live** with an **introduction to North America** and share about **where they have traveled**. We will focus on **countries, flags, and animals of North America** so that they can get even more familiar with where they live.

Our LAPMS Remote Learning team aim to prepare children to be ready for anything, including emergencies. We will introduce **what is inside an emergency kit** and discuss the **importance of knowing your address, phone number, and emergency contact numbers**. We will also continue **building social skills** such as **being thankful and kind**, as well as **practical life activities** such as **the proper way to blow our noses**.

In addition, we will exchange stories and learn more about some **national and International November holidays**. We will practice **Sign Language and Spanish**. We will make festive **arts and crafts**. We will also have fun with **science experiments** and **physical fitness**.

November Themes

- **Math: 10s & Units, Single Digit Addition**
- **Language Arts: Reading, Handwriting, Compound Words, Phonetic Sounds c, r, p**
- **Public Speaking: Sharing about Weekend Activities, Book Reports, "I am thankful for..."**
- **Science Experiments: Walking Water, Making Playdough, Leak Proof Bag**
